U polje *Name* upišite naziv konekcije (ovo je bitno jedino ADSL uredjaju, možete upisati tekst koji želite, u našim primerima je to tekst **Gama**). Iz polja *Type* odaberite opciju **Bridge**.

U koloni *PVC Settings* nadjite polja *VPI* i *VCI*. U polje *VPI* upišite **8**, a u polje *VCI* upišite **35**.

Kada završite sa podešavanjem parametara, kliknite na dugme Apply.

Nakon podešavanja, iz glavnog menija odaberite opciju *Tools*, a nakon toga iz menija sa leve strane odaberite opciju *System Commands*. Nakog toga kliknite na dugme *Save All* i sačekajte da se snime podešavanja uredjaja. Kliknite na dugme *Restart* i sačekajte da se uredjaj restartuje. Nakon restarta, uredjaj će automatski uspostaviti vezu.
