

## Broadband Dial-Up Connection Setup Guide (Windows XP)

Open **Control Panel** and select **Network Connections**, then run the **New Connection Wizard**.

After the Wizard starts, read the welcome screen, then click **Next**.

Select **Connect to the Internet** and click **Next**.

**Network Connection Type**  
What do you want to do?

- Connect to the Internet**  
Connect to the Internet so you can browse the Web and read email.
- Connect to the network at my workplace**  
Connect to a business network (using dial-up or VPN) so you can work from home, a field office, or another location.
- Set up a home or small office network**  
Connect to an existing home or small office network or set up a new one.
- Set up an advanced connection**  
Connect directly to another computer using your serial, parallel, or infrared port, or set up this computer so that other computers can connect to it.

Select **Setup my connection manually** and click **Next**.

**Getting Ready**  
The wizard is preparing to set up your Internet connection.

How do you want to connect to the Internet?

- Choose from a list of Internet service providers (ISPs)**
- Set up my connection manually**  
For a dial-up connection, you will need your account name, password, and a phone number for your ISP. For a broadband account, you won't need a phone number.
- Use the CD I got from an ISP**

Select **Connect using broadband connection that requires a user name and password** and click **Next**.

**Internet Connection**  
How do you want to connect to the Internet?

- Connect using a dial-up modem**  
This type of connection uses a modem and a regular or ISDN phone line.
- Connect using a broadband connection that requires a user name and password**  
This is a high-speed connection using either a DSL or cable modem. Your ISP may refer to this type of connection as PPPoE.
- Connect using a broadband connection that is always on**  
This is a high-speed connection using either a cable modem, DSL or LAN connection. It is always active, and doesn't require you to sign in.

In the ISP Name field, enter connection name. **Note:** Connection name will be displayed under connection icon.

**Connection Name**  
What is the name of the service that provides your Internet connection?

Type the name of your ISP in the following box.

ISP Name

The name you type here will be the name of the connection you are creating.

< Back    Next >    Cancel

Enter your username and password in the appropriate fields, then click **Next**.

**Internet Account Information**  

You will need an account name and password to sign in to your Internet account.

Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)

User name:

Password:

Confirm password:

Use this account name and password when anyone connects to the Internet from this computer

Make this the default Internet connection

Check the box next to **Add a shortcut to this connection to my desktop** to create a desktop shortcut for your dial-up Internet connection. Click **Finish** to complete the settings.
